

About Us

Royal Wire Industries is an extrusive firm that deals in manufacture & supply of various ranges of stitching wires. The supreme quality raw material, effectual manufacturing process, dedicated workforce and dedicated support at the firm has made it stay ahead of its competitors at all times.

Our workforce from technicians to engineers to quality auditors to labour are all experienced and trained in their respective sectors. Moreover, our machinery is perfect and techniques are fresh and updated. Under the guidance of our mentor, Mr. Nikhil Handa, the firm is all set to capture the world with its exquisite set of products and services.

Our well defined system, efficient production and splendid technology usage have made us a force to reckon with in the wiring industry. We are blessed with a spacious infrastructure, warehouse, packing house and manufacturing space to ensure hurdle free and timely production. Our quality finished products are made with usage of pure metals & alloys and so the result is a well set of furbished wires.

We have a diverse product range as we produce as much as 3 sorts of stitching wires which include: Galvanized Stitching Wire, Rust Resistant Galvanized Stitching Wire, Galvanized Flat Stitching Jumbo Coil. All our wires pass the major credentials like durability, resistance, reliability and easy handling etc.

We have an exquisite feature of customization which provides our clients with the liberty to demand any product as per their requirement and specification.

We have achieved a high C-SAT rate, thanks to our inexplicable quality control process, competitive pricing, timely delivery, supreme packing, customization ability and a well-equipped production unit.

We assure all our clients a timely & supreme quality delivery at most appropriate prices.

Galvanized Stitching Wire

Galvanized Stitching Wires are highly effective as they are made up of mild steel and coated with zinc through an electroplating process. They are supremely packed and delivered maintaining highest functionality and that is why they are high on the demand list of all our customers. Moreover, we use perfect machinery, updated technology and comply with all the required industry standards to maintain optimal quality of wires.

Sizes:
The wire gauges are available in 2kg coils. They can be even customized on clients requirements.

Usage:
Used in Corrugated box Industries, Carton stapling.

- Advantages:**
- ✓ Polished & well furbished
 - ✓ Appealing & bright looking
 - ✓ Safe to use
 - ✓ Cost effective
 - ✓ Durable & highly resistant
 - ✓ Made by usage of characteristic raw material

Broad Flat

ISWG Wire Gauge	Size In Inches	Size In mm	Approx Per LBS		Approx Per Kilo	
			Metres	Feet	Metres	Feet
12x25	0.104 x 0.020	2.50 x 0.50	50	168	110	370
13x25	0.092 x 0.020	2.36 x 0.50	55	175	120	385
14x25	0.080 x 0.020	2.03 x 0.50	89	291	195	640
17x25	0.056 x 0.020	1.42 x 0.50	146	479	320	1055

Rust Resistant Galvanized Stitching Wire

These wires are also made of mild steel and coated with zinc through a hot galvanizing process (passing of wire through melted zinc at a high temperature). However, they are more costlier and effective than regular Galvanized stitching wires due to their added corrosion resistant ability. Made with the use of top notch raw material and an infallible technology, these wires are matchless & proficient.

Sizes:
The wire gauges are available in 2kg coils. They can be even customized on clients requirements.

Usage:
Used in Corrugated box Industries, Carton stapling.

- Advantages:**
- ✓ Effective & better coating
 - ✓ Rust Resistant
 - ✓ Highly durable & lasts longer
 - ✓ Economical in comparison to brass & copper wires
 - ✓ Easy to use & handle

Quality Control

Royal Wire Industries encompasses connoisseurs in all sectors of its unit. The quality control department is no less and comprises of spectacular team of auditors who regulate quality checks at various intervals to ensure a well defined & fabricated finished product and a hurdle free production and supply. We are blessed with a great repute, thanks to our supreme quality wires that have left all our customers satisfied and build their trust on us. A large chunk of this success is due to our quality control process.

✓ Quality Control process

1. Fixing responsibilities & accountabilities.
2. Creation of a system to govern the manufacturing process.
3. Creation of inspection, testing procedures and arrangements.
4. Regulation of quality control checks at regular intervals.

✓ Quality Control Checks

1. Quality check at the time of raw material purchase & transfer.
2. Quality check at the time of start of manufacturing process.
3. Quality check at various stages during production of wires.
4. Quality check at final stage of manufacture.
5. Quality check while packing and final dispatch of product.

✓ Parameters For Quality Control

The quality checks are made on the parameters of product reliability, durability, strength, resistance etc. Moreover we follow a systematic and refined manufacturing process, whereby errors are found and corrected automatically and quickly. Our tests, policies, arrangements and personnel are all operative & effectual.

We assure all our clients a timely & supreme quality delivery at most appropriate prices.
